Clausiusstrasse 33, CLTE 11 • CH-8092, Zurich • Phone: +41-78-810-9776

EDUCATION

California Institute of Technology, Pasadena, California
PhD, Aeronautical Engineering, June 2014.
Master of Science in Aerospace Engineering, June 2010.

Georgia Institute of Technology, Atlanta, Georgia
Bachelor of Science in Aerospace Engineering, May 2009.

CURRENT POSITION

SEP '14 - PRESENT

Post-Doctoral Scholar - ETH, Zurich

- Fluid mechanics of collective behavior - examine the role of hydrodynamics in facilitating efficient fish-schooling.
 - Utilize deep reinforcement learning to create autonomous swimmers capable of extracting energy from their environment.
 - Use numerical optimization to discover body adaptations and swimming gaits that provide a competitive edge to certain fish species.
 - Turbulent flow and Artificial Intelligence - exploit deep artificial neural networks to formulate reduced order turbulence models.
-

PHD THESIS

Velocity resolved - scalar modeled simulations of high Schmidt number turbulent transport

- Established a fundamental understanding of the turbulent cascade physics for high Schmidt number passive scalar transport.
 - Developed high-fidelity numerical schemes for the transport of passive scalars in turbulent flows.
 - Analyzed the dependence of the subgrid scalar-flux on filter-kernel shape, and on the strain-rate tensor.
 - Examined the effectiveness of subgrid models for scalars in the viscous-convective subrange.
-

SKILLS

- Fortran, C++, High performance parallel computing (MPI, OpenMP), TotalView, Allinea DDT, CUDA
- HPC cluster administration, Matlab, Mathematica, Maple, Abaqus, Fluent, Paraview

HONORS

- Keck Institute of Space Studies Fellowship 2009 - 2010
- President's Undergraduate Research Award Spring '09, Spring '08
- Harvey Hochman, AE'54 Scholarship Spring '08
- Faculty Honors Spring '08, Fall '07, Summer '07, Spring '07
- Dean's List Fall '08, Fall '06

ADDITIONAL EXPERIENCE

REVIEWER

- Journal of Fluid Mechanics
- Journal of Turbulence
- Proceedings of the Royal Society A

BOOK

- *Matlab for Newbies: The bare essentials*, Amazon Kindle edition, 2015 (self-published)

RESEARCH INTERN - ROBERT BOSCH LLC, PALO ALTO, CALIFORNIA**JUL '13 - SEP '13****Multi-physics modeling of brake pad manufacturing process**

- Established a simulation framework to predict the impact of various manufacturing steps on the microstructural makeup of composite friction material.
- Evaluated various tools and models for simulating multiple physical processes including phase change, polymerization, fiber realignment, and the impact of stress waves on microstructure arrangement.
- Post-production Finite Element Analysis (FEA) of Representative Volume Element (RVE) to predict mechanical behavior of the finished product.

TEACHING ASSISTANT**Computational Methods for Engineering Applications I, ETH Zurich** **FEB '17 – JUN '17**

- Head TA - Taught a weekly exercise session on basic numerical methods. Responsible for grading and preparing homework and exam. Handled administrative matters related to the course.

Computational Methods for Engineering Applications I, ETH Zurich **FEB '16 – JUN '16**

- Taught a weekly exercise session on basic numerical methods. Responsible for grading and preparing homework and exam.

Computational Methods for Engineering Applications I, ETH Zurich **FEB '15 – JUN '15**

- Taught a weekly exercise session on basic numerical methods. Responsible for grading and preparing homework and exam.

Engineering Tool III: Object oriented programming with C++, ETH Zurich **FEB '15**

- Conducted interactive sessions with students new to programming in a low-level language.

Advanced Fluid Mechanics - Aerospace Engineering, California Institute of Technology **JAN '14 – MAR '14**

- Conducted interactive discussions with students. Responsible for grading and preparing homework solutions.

Undergrad Fluid Mechanics - Mechanical Engineering, California Institute of Technology **JAN '11 - MAR '11**

- Conducted weekly interactive discussions with students. Responsible for grading and preparing homework and exam solutions.

Introductory Calculus - School of Mathematics, Georgia Institute of Technology **AUG '08 - MAY '09**

- Taught two Calculus recitations per week and held weekly office hours. Responsible for proctoring tests and quizzes, and grading homework and exams.

RESEARCH MENTOR**Freshman Summer Research Institute (FSRI) – California Institute of Technology** **JUL '14 - AUG '14**

- Mentored two incoming freshmen on an intensive 6-week long project involving visualization of vortex structures in turbulent mixing layers.

Summer Undergraduate Research Fellowship (SURF) – California Institute of Technology **JUN '11 - AUG '11**

- Mentored an undergraduate student through a 10-week long project that assessed the numerical impact of introducing variable density in turbulent flows.

UNDERGRADUATE RESEARCH ASSISTANT**Computational Fluid Dynamics - Georgia Institute of Technology (*Advisor: Prof. S. Ruffin*)** **JUN '08 - MAY '09**

- Computational analysis and optimization of blunt nosed re-entry geometries in hypersonic flows for use in planetary re-entry vehicles.

Propulsion in Scramjets - Georgia Institute of Technology (*Advisor: Prof. S. Menon*) **AUG '07 - AUG '08**

- Experimental research focused on the study of cavity induced fuel mixing in scramjets.
- Responsible for programming and streamlining in-house software for data acquisition, and digital hardware control using Matlab. Responsible for creating a graphical user interface for the software.

RESIDENT ASSISTANT - GEORGIA INSTITUTE OF TECHNOLOGY

JAN '07 - MAY '09

- Responsible for ensuring the safety and well-being of over 60 students in the residence halls. Assisted residents in making their stay a personally and academically fulfilling experience.

CONFERENCE VOLUNTEER

- Platform for Advanced Scientific Computing Conference, Zurich, Switzerland, June 2015
- 2nd Frontiers in Computational Physics Conference: Energy Sciences, Zurich, Switzerland, June 2015
- American Physical Society Annual DFD meeting, San Diego, California, November 2012
